## 2.6 - Student Performance and Learning Outcomes

2.6.1 - Teachers and students are aware of the stated Programme and course outcomes of the Programmes offered by the institution.

Displaying program and course outcomes on the college website under the menu "Academics" aligns with the guidelines set by the University Grants Commission (UGC) and demonstrates the institution's commitment to transparency and accountability in its educational offerings. Program outcomes (POs) and course outcomes (COs) are essential components of program accreditation and quality assurance processes. Program Outcomes (POs) typically describe what students are expected to know and be able to do by the time they graduate from a particular program. They are broader statements that encapsulate the overall goals of the program and the skills, knowledge, and attributes students should possess upon completion. Course Outcomes (COs) are more specific and are related to individual courses within the program. They outline the specific learning objectives and expected outcomes of each course, guiding instructors in designing curriculum and assessments and helping students understand what they will learn and achieve in each course. By displaying POs and COs on the college website, prospective students, current students, faculty, and other stakeholders can gain insight into the educational objectives of each program offered by the institution. This transparency enhances accountability and allows for informed decision-making by students when choosing programs and courses

Practical examinations, viva-voce, and group discussions are utilized to evaluate learning outcomes objectively.

(B) **Students' Feedback:** A structured questionnaire covering teaching quality, infrastructure, library facilities, and overall learning experience is provided to students for feedback. This helps in identifying areas for improvement and enhancing the overall educational experience.

(C) **Parent-Teacher Meetings/Monitoring:** The institution conducts parent-teacher meetings as needed to discuss students' progress. Additionally, departments regularly monitor students' progress, ensuring effective communication between parents and faculty.

(D) **Academic Audit:** Regular academic audits, both internal and external, are conducted by the Internal Quality Assurance Cell (IQAC) using a structured questionnaire. This helps in assessing the effectiveness of educational processes and identifying areas for enhancement.

(E) **Progression to Higher Education and Placement:** The institution measures students' learning outcomes through their progression to higher education and placements. Departments provide guidance for pursuing Master's degrees, and the Placement Cell offers information on job opportunities related to students' fields of study.

## 2.6 - Student Performance and Learning Outcomes

2.6.1 - Teachers and students are aware of the stated Programme and course outcomes of the Programmes offered by the institution.

Displaying program and course outcomes on the college website under the menu "Academics" aligns with the guidelines set by the University Grants Commission (UGC) and demonstrates the institution's commitment to transparency and accountability in its educational offerings. Program outcomes (POs) and course outcomes (COs) are essential components of program accreditation and quality assurance processes. Program Outcomes (POs) typically describe what students are expected to know and be able to do by the time they graduate from a particular program. They are broader statements that encapsulate the overall goals of the program and the skills, knowledge, and attributes students should possess upon completion. Course Outcomes (COs) are more specific and are related to individual courses within the program. They outline the specific learning objectives and expected outcomes of each course, guiding instructors in designing curriculum and assessments and helping students understand what they will learn and achieve in each course. By displaying POs and COs on the college website, prospective students, current students, faculty, and other stakeholders can gain insight into the educational objectives of each program offered by the institution. This transparency enhances accountability and allows for informed decision-making by students when choosing programs and courses
